AquaClear® Multipurpose Solution
Usage Instructions

DIRECTIONS FOR USE:
To open the bottle, turn cap counter clockwise. The cap has a tamper evident ring that breaks when it is turned counter clockwise. Do not use if the ring is broken before first use. Replace cap after use.

To obtain cleaning and disinfection, the following steps must be completed:

STEP 1: HAND-WASHING
Wash, rinse and dry your hands thoroughly before handling your lenses.

STEP 2: DAILY CLEAN
Place 3 drops of AquaClear™ MULTIPURPOSE SOLUTION on each side of your right contact lens. Rub for 10 seconds. No separate daily cleaner necessary.

STEP 3: RINSE
Thoroughly rinse each side of your right lens for 5 seconds with fresh AquaClear™ MULTIPURPOSE SOLUTION.
Place your lenses in an approved contact lens case as advised by your eye care professional.
Rub and rinse your lenses for the recommended amount of time to help prevent serious eye infections. Repeat steps with your left lens.

STEP 3: SOAK
Using an approved lens case add enough fresh multipurpose solution to cover your lenses. Soak for at least 6 hours, for disinfection, cleaning, protein removal and conditioning. Rinse each side of the lens with fresh multipurpose solution prior to insertion.
Only when all the above steps are completed are your lenses ready to wear.
Use only fresh AquaClear™ MULTIPURPOSE SOLUTION each time you soak (store) your lenses.
If you are not wearing the contact lenses immediately, store in an unopened lens case.
Do not store your lenses in ordinary saline in the place of AquaClear™ MULTIPURPOSE SOLUTION. Saline solution will not disinfect contact lenses.
Your eye care professional may recommend additional products or procedures to care for your lenses based on individual tear chemistry and lens wearing schedule. Always follow your eye care professional’s instructions.

WARNINGS AND PRECAUTIONS:
• Do not wear the lenses unless you have allowed them to soak for at least six (6) hours in AquaClear™ MULTIPURPOSE SOLUTION as directed.
• Do not reuse or “top off” old solution left in your lens case since solution reuse reduces effective lens disinfection and could lead to severe infection, vision loss or blindness. “Topping-Off” is the addition of fresh solution to solution that has been sitting in your case. Always discard the remaining solution from the lens case.
• Do not use with heat (thermal) disinfection systems.
• Never reuse AquaClear™ MULTIPURPOSE SOLUTION. Always discard the remaining solution from the lens case.
• Store at room temperature.
• Use before the expiration date marked on the carton and bottle.
• Discard contents of the bottle 3 months after opening. Using your multipurpose solution beyond the discard date could result in contamination of the solution and can lead to severe infection, vision loss or blindness.
• Keep the bottle tightly closed when not in use.
• Keep out of reach of children.
