DIRECTIONS FOR USE:
To open bottle, turn cap counter-clockwise. The cap has a tamper evident ring that breaks when the cap is turned counter-clockwise. Do not use if the tamper evident ring is broken before the first use. Replace cap after use.

To ensure proper cleaning and disinfection of your lenses, the following steps must be completed:
1. Wash, rinse and dry your hands thoroughly before handling your lenses.
2. Open the lens case and place each contact lens into the appropriately marked L/R dome of the lens holder.
3. Thoroughly rinse each lens whilst in the lens holder for 5 seconds with fresh AquaClear™ hydrogen peroxide solution. **Only use lens case containing the platinum disc neutralizer when using AquaClear™ hydrogen peroxide solution.**
4. Fill the lens case up to the marked line with your AquaClear™ hydrogen peroxide solution. Do not overfill the lens case.
5. Place the lens holder into the lens case and close securely. Important: Do not over tighten the lens case cap.
6. Allow your lenses to soak for at least 6 hours or overnight ensuring that the lens case is in an upright position and that the lenses are fully immersed in the AquaClear™ hydrogen peroxide solution. Do not shake/invert the lens case during the disinfection process.
7. After a period of at least 6 hours, your lenses may be removed from the lens case and worn.
8. Always discard the remaining solution from the lens case.
9. Rinse the lens case thoroughly with un-preserved sterile saline (never use tap water) and leave it open to air dry.

Your eye care professional may recommend additional products or procedures (such as rubbing your lenses with a separate daily cleaner and rinsing with saline) to care for your lenses based on your individual tear chemistry and lens wearing schedule. Always follow your eye care professional’s instructions.

IMPORTANT: Do not rinse lenses with peroxide solution prior to inserting in the eye. Please note that if lenses are worn prior to the 6 hour neutralizing period then this may cause burning or redness to the eye.

**Warning:** Failure to discard solution from lens case after each use or use of water to care for your lenses may lead to contamination resulting in eye injury and potential loss of vision. See accompanying instructions for additional important safety information.

PRECAUTIONS
- Always discard the remaining solution from the lens case after each use.
- If your contact lenses have been stored in AquaClear™ hydrogen peroxide solution for more than 24 hours, repeat the neutralization process again following the directions for use.
- During the neutralization period keep the lens case upright and do not shake.
- Dispose of your hydrogen peroxide lens case after 31 uses or 1 month of daily use.
- Use before the expiration date marked on the carton and bottle.
- Keep the bottle cap tightly closed when not in use.
- Once bottle is open, discard any remaining solution after 3 months.
- Store below 25°C/77°F.
- Keep out of the reach of children.

**WARNINGS:**
- Do not put AquaClear™ hydrogen peroxide solution directly into your eye.
- Never rinse your contact lenses with AquaClear™ hydrogen peroxide solution before you put them in your eyes.
- Use AquaClear™ hydrogen peroxide solution with only the lens case provided. Do not use a regular flat lens case.
- Do not wear your contact lenses unless you have allowed them to soak for at least 6 hours in the lens case provided.
- Do not reuse or ‘top-off’ old solution left in the lens case.
- If unneutralized AquaClear™ hydrogen peroxide solution comes in contact with your eyes, it may cause burning, stinging or redness. Remove your contact lenses immediately and flush your eyes with a large amount of water or sterile saline. If burning or irritation continues, seek immediate assistance from an eye care professional.
- If AquaClear™ hydrogen peroxide solution is accidentally swallowed, an upset stomach and vomiting may result. Seek immediate professional medical assistance or contact a Poison Control Center (1–800–222–1222).
- AquaClear™ hydrogen peroxide solution cannot be used with heat (thermal) disinfection systems.
- Do not use the Aquaclear hydrogen peroxide lens case for more than 31 uses or 1 month of daily use.
